

Firewall Settings

Be sure to include the full subnet range and not single IP information to ensure best quality of service.

net2phone Subnets

206.20.196.1/23

66.33.176.64/26

Open UDP ports 10000 - 65500

Provisioning:

portal.net2phoneoffice.com (66.33.176.73) http (port 80)

prov.net2phone.com http (port 80)

Depending on your router or firewall equipment manufacturer, please ensure SIP ALG is disabled and UDP port timeout is set to a minimum of 300 seconds.

Failure to adhere to either of these settings may cause quality issues.

Please consult your manufacturer's documentation for specific "how-to" settings.
