

Fax Service

The World's Largest VoIP Provider

\$19⁹⁵*
per month
No Contract

Unlimited Local and Long-Distance Including 25 Countries

* Taxes, FCC and 911 fees not included

Faxing has never been easier. Just upload or attach your document, enter fax number and click send...

How it works...

Net2phone relocates your fax number to their cloud server which, eliminates the need for a physical phone line. The server converts all incoming faxes to a PDF, which is delivered to your email as an attached file. Outgoing faxes are sent from your desktop using a fax driver that works just like a printer.

Fax to Fax (Old School)

Keep that traditional fax machine. If you prefer to use your existing fax machine like it does now, no problem. Net2phone Fax to Fax provides an optional adapter that simply acts as a phone line for your fax machine. (The adapter requires a connection to your network)([LEARN MORE](#))

Eliminate Line Cost... No Phone Line Required

The good news is you do not need to pay for phone lines. Fax to Fax is Fax Over Internet. Since it collects all of your fax and sends it to our Cloud Based Fax Servers, phone lines and problems with faxes are a thing of the past.

- View and store all your faxes online
- Receive faxes as email attachments
- Send and receive faxes from web portal
- Always online. Never busy or out of paper
