

A Pure IP PBX designed to expand the capabilities of any business.

A Platform that stays on the cutting edge

The IPitomy IP1100/1200 is a powerful business communications platform. A pure IP PBX designed to bring power and flexibility to your business. IPitomy blends the present with the future in business telecommunications and will grow with your business assuring a smooth transition into next generation technology. With features designed for today's business environment and flexible capabilities for all of your future needs, IPitomy is the smart choice.

Managing your team

Managers have access to users status right from a PC screen. Easily see who is on the phone, away from their desk, callers in queue and PBX activity at a glance. Advanced features like intra-company text messaging adds another channel of communications so users can communicate via text messaging while on a call. Remote users can be added to the system just as though they are in the same building.

Keeping up with rapidly evolving technology

Telecommunications technology has been undergoing unprecedented innovation, driven by the rapid evolution of technology. The information technology revolution brought about by the Internet has spurred world-wide growth of connectivity and infrastructure. Legacy telecommunications services are being replaced by VoIP which is becoming the norm in business communications. The big advantage of VoIP is that it makes voice and other media travel on the same data pipeline like the rest of the Internet. IPitomy can become your own cloud communications platform that can increase efficiency and reduce expenses dramatically. Communicate quickly and simply across your entire company whether employees are in the office, on the road, or telecommuting from home. Your communications world just got a lot smaller. IPitomy leverages IP telephony and SIP technology to make state-of-the-art tools like softphones, remote phones, and branch office networking practical and affordable solutions for entrepreneurial business owners who want the best. Wherever your employees are located, they can now communicate.

IPitomy IP PBX

IP1100/IP1200

Your customers appreciate efficiency.

Features like Follow-Me, corporate text messaging, simple point-and-click transfer and presence management, assure that your customers and prospects will experience the ultimate in customer service and return again and again to do business with you.

Investment protection is the name of the game.

Industry-tested and proven in hundreds of thousands of installations around the world, the VoIP architecture on which IPitomy IP1100/1200 is built will ensure that the IP PBX in which you invest today will remain a viable and valuable business asset now and in the future. You will always be able to take advantage of the latest advancements in technology and feature enhancements. IPitomy uses the SIP protocol. This provides easy access to a world of exciting products and services like SIP Trunks that save money and increase productivity now and in the future.

With IPitomy you are in control.

You choose the pace at which you introduce new features and functionality into your business. The IP1100/1200 has all the functionality built-in and ready for you when you want it. Use traditional dial tone or move to SIP Trunks. Want your Voice Mails to be delivered by email? No problem, it's included. Advanced features like follow-me, Music on Hold, Conferencing are all included. Soft Phones can be used for a great alternative for traveling employees. IPitomy includes tools to allow your employees to control their phone features, forwarding and Voice Mail from an easy to use Portal.

Beyond Traditional Expectations in a Business Phone System

The IP1100/1200 has all the features you would expect from a business phone system, but that's just where the excitement starts. IPitomy has enhanced the entire application with IPitomy Q-Manager. IPitomy Q-Manager provides state of the art presence management, user status, text

and messaging plus presence and text extended to your mobile phone. Calls can be transferred, parked, recorded and monitored with the click of a mouse.

Mobility

Calls can be transferred from IPitomy back through the system from your mobile phone. Smart phones like iPhone and Android can even be an extension on the system by loading a SIP based soft phone.

IPitomy Text Messaging XMPP Server

Every IPitomy IP PBX includes an XMPP server integrated into the system. Employees can collaborate using voice and text messaging adding another dimension to your communications environment. IPitomy Text Messaging is compatible with a wide range of XMPP compliant clients so your communications environment can extend beyond the office to mobile devices such as smart phones and iPad's.

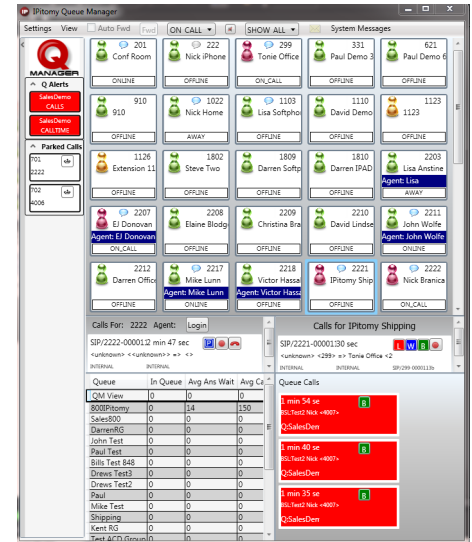

Receptionist Console

With IPitomy QManager, operators and attendants can find and reach any and all employees to effectively and efficiently manage incoming calls. If the user is in the office or a remote extension, they are all visible in QManager. Transferring calls by clicking on the user icon is much faster than the old traditional DSS console.

Make the Most Out of Open Standards

Don't get stuck in the past with equipment that is already obsolete. IPitomy is state of the art and will keep your investment working for you now and into the future.
